

Apex Termite & Pest Control Response to Covid-19 Pandemic

There is not a business, organization, or community in the United States that has gone untouched by the Covid-19 global pandemic. In an effort to respond to our customers and provide for our team members and their families we have instituted necessary protocols in accordance with Federal, State and local guidelines as of this date.

During the #Covid19 pandemic our company is no longer receiving visitors outside of our organization in an effort to protect our employees. We are also advising our people to self-report if

they are feeling ill before coming to work and cleaning common surfaces on an accelerated regular schedule. We are maintaining safe practices and encourage other companies to do the same. We are keeping our distances as jobs allow.

We have made the decision to protect and support our customers in need of Termite and Pest Control. We are asking any customers to receive scheduled service if they or anyone in their home/business is ill in order to protect our technicians. At the same time, we will not send any technician to perform service who is ill or under the weather. We would rather err to the side of caution in an effort to protect our team members and customers.

If you call for service please let us know if ANYONE in your home is ill, or sick. We can provide total coverage on the exterior without ever having to be in personal contact. We are also asking our employees and technicians to self-report if they are feeling ill or under the weather.

Our first priority is the safety and welfare of our people and customers. We recognize the severity of this global pandemic and we are ready to attend to our customer's needs without personal engagement normally required in service. Simply call us and we can make arrangements for non-engagement while still being able to respond to your termite and pest control needs.

Let's all be safe out there and practice wise personal hygiene such as social distancing, hand washing, disinfectant usage, and common sense. We care about our team, their families, our clients and theirs as well. America has faced every serious challenge with courage, dignity, wisdom, hard work and ingenuity. We have no doubt the best of the American spirit is going to come together and minimize the Covid19 risk as much as we can!
